TagFaster Automatic Applicator

This multi-shot applicator is exclusively designed to apply the Z Tags TagFaster (MF10 and MF10 TE) range of tags.

The applicator is loaded with a strip of 20 tags minimising the time spent on loading, in comparison to individual tags. Easy and fast to load, and apply the tag, this is a time saving device.

The TagFaster applicator automatically releases after application eliminating the possibility of torn ears and greatly improving tag retention. TagFaster tags can be applied with the TagFaster applicator from either the front or the back of the animal's ear (sheep & goats). The tag pins are covered for cleanliness and to prevent tangling in the wool.

Lightweight and balanced in the hand the applicator is suitable for use when tagging in conveyors, marking cradles, handlers, or in a race or pen. Spare parts are available for maintenance, if required.

Technical Specifications

Dimensions	237.5mm x 214mm x135.5mm
Weight	415 g
Material	High resistant plastic materials for long term durability
Storage	Protect from direct sunlight, rain and water (≥ -25°C to ≤ +55°C)
Product codes	800 0600-031 Z Tags TagFaster Automatic Applicator
	800 0600-032 Z Tags TagFaster Automatic Applicator Blade Kit
	800 0600-033 Z Tags TagFaster Automatic Applicator Pecker Kit
