

## Automatic Tag Faster Applicator

### Product Description

This multi-shot applicator is exclusively designed to apply the Z Tags TagFaster range of tags.

The applicator is loaded with a strip of 20 tags minimising the time spent on loading individual tags. Easy and fast to load, you'll save time at tagging.

The TagFaster applicator automatically snaps back after application which eliminates the possibility of torn ears and greatly improves tag retention. TagFaster tags can easily be applied with the TagFaster tagger from either the front or the back of the animal's ear (sheep & goats). The tag pins are covered for cleanliness and to prevent tangling in the wool.

The tagger is suitable for use when tagging in conveyors, marking cradles, handlers, or in a race or pen.
