

F413, M413 Two Piece Tag – Extra Large

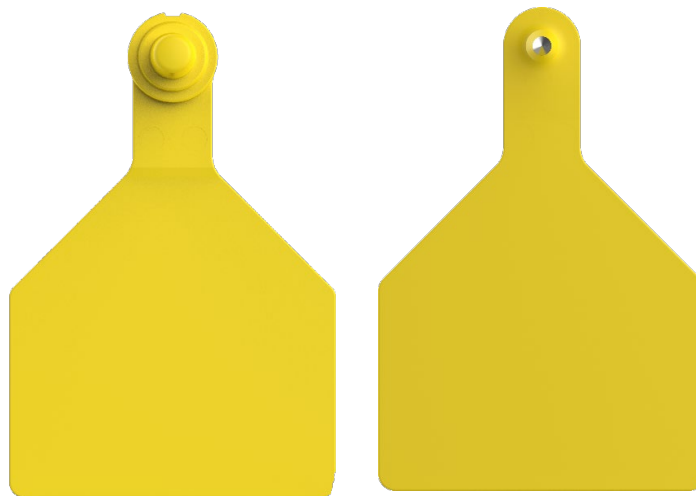

Product Description

This 2-piece system, combining a female tag with a male tag delivers superior retention, using a flexible material ensuring that the tag will not snag and pull out, or break off.

The free rotating design promotes rapid wound healing and allows the tag to hang correctly. This gives better readability from the front and back of the animal's ear. The male tag has a sharp 60° metal tip.

Tag numbers can be laser-printed, or written on with the Z Tags No Fade ink marker.

The pair is available in a wide range of colours that can be used for management and differentiation of groups of animals within the herd.
